John Reilly of 215 Past Fifty-eighth street sat on the stringpiece of the pier at East Fifty-first street on Thursday afternoon and began dozing. He had just about three asps of sleep when his font slipped and he tumbled off into the river, A great many children play on the pier, and a number of them saw Reilly fall. They screamed and ran up to the street. Park Policeman Henry J. Dwyer was at Fiftieth street and the river, and a roundsman and patrolman belonging to the East Fifty-first street station were near by. Dwyer had a day off and was in citizen's He leard the children scream and started for the Fifty-first street pier as fast as his legs could carry him. The folls was running strong, and it carried him away from the per and nearly a block down stroam. The shore is rocky along there. Before he reached the next pier he was far enough in to forch bottom, and he waded the rest of the way, pushing Relity, who was unconscious, ahead of him. As soon as he saw that freyer had the man, the patrolman on shore run to the rearest police lox and sent in an ambulance call. Then he ran back just in time to help the Park policeman set his man up on shore. Duyer is a graduate of the "First Aid for the lingred" school, and his knowledge came in handy, the ollowed the instructions right through, and, with the aid of the city peliceman, used artificial respiration. They worked stendily for twenty minutes. A big crowd gathered to watch them, and made suggestions which were not heeded, In spite of all they could do they could not bring Relly back to consciousness. The ambulance came from Flower Hospital. The ambulance came from Flower Hospital. The surgeon saw what had been done and said he guessed Reilly was a coner, but he took him aboard and hustled him off to the hospital, where half a dozen doctors succeeded in getting him back to life. Dwyer in the mean three went to his home in Flast Fifty-second street and got on dry clothes. He was pretty nearly exhausted, and he sent word to the station on Thursday night that he couldn't work. That is how it happened that the case wasn't reported until yesterday. Buyer was on duty last night in Hattery Park at the music stand. He said the rescue didn't smount to much. "I'm the captain of the Volonteer Life Sawing Corps." he said. "and this isn't the first time I've been lucky enough to save a fellow. If I count right this is my fifteenth, I've been on the l'ark police twelve years and I haven't had much chance lately. My last one before this was about nine years age. I thought it was a child I was going after yesterday, there were so many children around. This man must have been going down about ten feet for him, I snould judge. The river there is twenty-live or thirty feet deep, and I guess he was half way down. He was pretty heavy and he played me before I was a bricklayer, but i spent all my stare time in the water. I belonged to a lot of boat clubs. Fulling a man out of the water much; it's the lists and to the mirred 'that does the business. That was what saved this man yesterday, If we hadn't known just what to do the moment we got him out of the water it would have been all powith him. Buyer has a good record in the Park Department. A couple of years ago he was all broken up in stopping a runaway in Central Park. He just escaped with his life then.

JOHN'S PARK ASSESSMENTS.

The Commissioners' Report Objected to by Owners of Affected Property. The St. John's Park matter came up in Supreme Court, Chambers, yesterday on a motion for the confirmation of the report of the Commissioners, Eugene S, Ives, Richard Deeves, and Joseph Ullman, who were appointed several years ago to take testimony and make awards and assessments upon adjoining property in proceedings taken for the condemnation of St. John's Cemetery for the purposes of a public park to be called St. John's Park. The motion for confirmation was made by Assistant Corporation Counsel John P. Dunn, and was op-posed by Michael J. Mulqueen and Truman H. Baldwin in the interest of the property owners upon whom assessments have been laid.

According to the original estimate the expenses of this proceeding were said to be about \$203,000, upon which the property owners were to be assessed one-half, or \$101,000. This estimate was made about five years ago. It has now been found that the expenses of the Commission in this proceeding amount to about \$520,000, which will impose an assessment upon the property owners of about \$263,000. Assistant Corporation Counsel Dunn insisted that the ant Corporation Commissioners was final in so far as the awards were concerned, but that if the Judge considered that the assessments were erroneous he had the power to correct them. He said that the property owners were abxlous for a park live years ago, and now that it has been arranged for them they are making a most vigorous kips against it. vigorous kick against it.

Mr. Mulqueen contended that there had been an unjust discrimination in the distribution of the assessments.

Lawyer Baldwin argued that the report should Lawyer Ballwin argued that the report should be sent back for further consideration. He termed the report "a judicial lie" has much as he declared that it did not express the opinion of the Commissioners themselves, but was based upon a resolution of the Board of Street Openings made five years ago that one-half of the cost of the improvement should be imposed upon property within a certain district specified in the resolution. Decision on the mo-tion was reserved.

supply whatever bills might be required to cover legitimate remittances. The shipment of \$250.-000 gold to-morrow has been hanging over the exchange market for nearly a week, and the character of the operation is perfectly well understood by bankers having close relations with Europe, The shipment is described by the the brokers making it as a "mercantile transaction," but that phrase will deceive no one familiar with Wall street affairs.

It is a matter of notoriety that for a week past bears upon the stock market have endcavored to torce shipments of gold to Europe, and they were doubtless constrained to move in the matter to-morrow by the fact that both cotton and grain "futures" are now being offered for the While workmen were repairing the track of first time this season. The transaction has unquestionably been played for all it is worth in the stock market. The Street is beginning to entertain suspicions regarding the United States Leather stocks, which are strengthened by the policy of the company regarding the payment

The plan for the finencial reliabilitation of that company has, as will be seen in an adjoining column, been endorsed by a number of prominent banks and bankers who are largely interested in the securities of the company. They unquestionably realize that the present condition of the company results from the efforts of its predecessor to control the entire spindle caspacity of the country. To carry out that policy mills were purchased at extravagant figures. regardless of their cost, and the company became possessed of a larger manufacturing plant than could be operated to advactage under the most favorable conditions. The previous reorganization did not apparently take into account the necessity of a concentra-

The deposits of securities under the plan of reorganization of the Central Railroad and Earking Company of Georgia, proposed by Messrs. Samuel Thomas and Thomas F. United States Cordage Co. REORGANIZATION.

NEW YORK, July 12th, 1898. The undersigned, at the request of a large number of holders of the securities of the UNITED STATES CORDAGE COMPANY, have extended the time for the deposit of securities to and including July 20th,

1895, under the plan of reorganization: 1. The plan proposed was arrived at after a careful examination of the property and business of the Cordage Company by disinterested persons familiar

with the business an | competent to judge. 2. The total of fixed charges proposed by the plan is the limit which the reorganized company should as-sume, and all that a consideration for the interests of bondholders and stockholders slike will warrant.

 New capital, as proposed in the present plan, to absolutely necessary, and at an early day. 4. An underwriting in full has been obtained; no other plan is proposed, and no other underwriting exists; and an abandonment of the plan, with a sub-sequent closing of the going business of the Company,

would be simply disastrous.

Deposits to be made with the Manhattan Truck ompany of New York as follows: First Mortgage Bonds, without assessment. Guaranteed Stock, with first installment

The Mercantile Trust Company, Depository, By LOUIS FITZGERALD, President.

TO THE BONDHOLDERS OF

The United States Cordage Co.:

A plan of reorganization has been formed under which you have been invited to deposit your bonds with the Manhattan Trust Company. It appears to be the best of which circumstances admit. New money has to be raised, and no plan to raise it, except by a first lien, has yet been suggested. We have deposited our bonds and those we represent, and advise the prompt acceptance of this plan and only means, in our judgment, of averting further heavy loss. We believe that if the mills are closed and the business of the company passes to competitors, further disaster will re-

sult to the bondholders. New York, July 12, 1895. J. P. MORGAN & CO. W. W. SHERMAN. Prest, of Nati, Bk. Commerce, G. G. WILLIAMS,
